

SQL

1. DML & DDL

1.1 TRUNCATE

清空表格数据，类似 `delete from tablename`

1.1.1 语法

```
TRUNCATE TABLE table_name;
```

1.1.2 vs DELETE TABLE

更快、更少资源占用

Truncate table is faster and uses lesser resources than DELETE TABLE command.

1.1.2 vs DROP TABLE

`DROP TABLE` 会删除表结构，`TRUNCATE TABLE` 不会；

1.1.3 注意

一旦使用 `TRUNCATE TABLE`，无法回滚

The rollback process is not possible after truncate table statement. Once you truncate a table you cannot use a flashback table statement to retrieve the content of the table.
