

## 类/接口

---

- 注解

- 获取注解对象

```
xxAnnotation annotationObject = AnnotationUtils.findAnnotation(targetObject.getClass(),  
xxAnnotation.class);
```

- 获取注解属性

```
Map<String, Object> annotationAttributes =  
AnnotationUtils.getAnnotationAttributes(annotationObject);
```

还可以借鉴 `WebSecurityConfiguration` 类，通过实现 `ImportAware#setImportMetadata` 获取到注解属性：
